SITUATION ON WALL STREET

FINANCIAL REVIEW

is an Expectant Market-The Cereal Crop Prospects-Effect of the Greco-Turkish War-Revival of Cuban Question a Dis tarbing Factor-Reduction in Rate of Interest on Investments.

SEW YORK, May 15.-Wall street still remains sluggish, though with no abatement of the general steadiness of values. One of the conspicuous fea-tures of the stock market is its ready responce to favorable influences, and its comparative insensibility to such as are unfavorable . The predeminant underlying conviction appears to be that the prevailing level of prices is not only a

iring conviction appears to be that the prevailing level of prices is not only a safe one but below the real intrinsic merits of securities, considering existing conditions and the prospects fairly educible from the general situation of affairs. But as this view counts more intrinsic merits of securities, considering existing conditions, favorable occurences do not lead to any really active and atquired upward movement. In brief, it is largely an expectant market, and in that sense not yet sufficiently developed to induce active operations.

This hopeful tone has been confirmed by a steady and really important improvement in the condition of the certain crops during the last week or tendays. The government weekly crop report states that crop-conditions in the upper Mississippi and Missouri valleys, for the week ending May 10, have been the best of the season and really excellent for farming operations and the growth of crops. Under the favorable weather conditions prevailing in the weaker conditions prevailing in the weaker conditions prevailing in the weaker in Minnesota. In the Middle Ariantie states and to the southward of the Ohio and Missouri rivers, planting is generally nearly completed. Winter wheat continues promising in the Middle Ariantie states and in Kentucky and Tennassee, reports from the last two maned states being exceptionally favorable. Further improvement is also indicated from Ohio and Indiana, and the crop is reported as doing well in Illinois Missouri and portions of Kansas. In Oregon and Washington the contions is very promising, but in California the crop has been greatly injured by hot winds. Spring wheat seeding we readirelate completed. Minnesota and search process and the continues of the contions is very promising, but in California the crop has been greatly injured by hot winds. Spring wheat seeding we readirelate completed. Minnesota and search in the continues of the continues o the crop is reported as adding wen in illinois Missouri and portions of Kansas. In Oregon and Washington the outlook is very promising, but in California the crop has been greatly injured by hot winds. Spring wheat seeding is practically completed, Minnesota and North Dakota having about finished during the week. Over the central and southern portlone of the Spring wheat region the early sown has a good start and is growing well. Private reports of later date, from some of the Western centres, are still more sanguine. These accounts suggest the possibility of a better spring wheat harvest than has been intherte expected, though they do not suffice to offset the probabilities of a short general crop, owing irremediatic injury to the winter wheat. All the information from foreign markets points to the probability of a short world's crop of wheat. European buyers are showing a disposition to discount that prospect by making contacts in our markets, but their bids that prospect by making con-in our markets, but their bids thus far been too low to admit of letions. The probability, however, to be that, upon such simples of a sa we have for export from the larvest, we shall realize relative-in prices.

left in the second second this market during the week. That centre has still taken a hopeful view of the options of the Greca-Turkish war; and take of discount to two per cent is constraed as implying a settled conviction in the highest fluancial circles that, upon one basis or another, a peace between the belligerents is sure to be straed as implying a settled conviction in the highest financial circles that, upon one basis or another, a peace between the beligerents is sure to be reached. The London situation has thus favored speculative operations, and New York sales of stocks to that market have reached about 30,000 shares for the week. These transactions have supplied from \$1,20,000 to \$1,500,000 of exchange, which is to be presumed has so far limited the amount of gold which otherwise would have been exported. At the hour of writing, the gold shipments of the week are expected to aggreate about \$1,900,000. At the current ries of exchange, gold can be shipped to the Confinent at a moderate profit, and as the supply of produce bills is not large there is no visible prospect of an immediate cessation of the overflow. In estimating the importance of this movement, however, it is to be kept in unind that the current remittances are due cheft, if not entirely, to quick payments for the extracrdinary importations being made in anticipation of an advance in tariff duties; the effect of which will be to correspondingly diminish remittances which, in the ordinary course, would have occurred some months later.

Another significant transaction has been consummated indicating the tendency towards a permanent reduction

The Illinois Central Ratiroad Company has negotiated an insue of \$30,000,000 of 3½ per cent first mortgage bonds to take up issues of the former Chesapeake & Ohlo Southwestern and the St. Louis & Terre Haute railroads, now incorporated in the Illinois Central system, the superceded bonds having bore interest ranging principally from \$ 10 \$ per cent. This, added to the many times larger conversions recently arranged for by other railroads, shows the willingness of capital to invest in large amounts at \$303 per cent. At the same time, it leaves no doubt of the possibility of other roads in good credit largely reducing their mortgage charges, with consequent advantage to the stock-bodding interest. The effect is to place dividend-paying shares in a much better position as to value, especially in the case of companies which have effected these reductions of interest; for a decide in the rate of interest means a relative state the extensive states value ninclosit. these reductions of interest; for a de-cline in the rate of interest means a rel-ative rise in the market value principal. One of the first effects of these conver-sions has been to turn the attention of investors to municipal securities, which appear to be esteemed as next in securi-y and desirableness to the railroad mortrage. A large amount of that class of issue is forthcoming, but there is a limit to the supply; and when that is reached, railroad shares will have their turn.

their turn.
The new phase of affairs in eastern Europe is appropriately to the hope of an the new phase of affairs in eastern Europe is encouraging to the hope of an early removal of that source of disturbance from foreign politics. It is not impossible that the settlement between Turkey and Greece may temporarily hang fire. For while Greece is ready enough to accept almost any terms that will save her army from annihilation. Turkey and to accept almost any terms that will save her army from annihilation. furkey may be expected to seize all the advantages she can procure from her victory; and hence may arise some anxious haggling between her and the powers. With impatience of restraint among the Turkish army on the other side, and the danger of a revolution among the Greeke on the other side, this act of suspense cannot be long endured and the result is likely to be that the nowers will feel themselves constrained to grant concessions to Turky from which the world's public opinion will foundly dissent. If Turkey is willing to suspend actual operations so as to sullow an opportunity for pacific forgotiations, the occurrence of the Post of Rairam, which lasts from the bith to the 16th of May, will come in very opportunity. In any event, the settlement is only a question of terms, and with one side submissive and the other under a strong repression from the powers it seems. FREE Silver-plated TEASPOON every large size

cussion in the United States senate. This is calculated to cause some selling of long stocks and a lower range of prices in consequence. HENRY CLEWS.

The Wool Trade.

Bradstreets: The demand for domes-tic wool has fallen off largely, and the tic wool has fallen off largely, and the tone is weaker under a slow trade. Fleeces are in small suppply and light demand, with general prices quoted about he same, and are obtained as supplies happen to be needed. Territory wools are in slow demand, and concessions have to be made to attract buyers. Dealers hold fairly steady, and, consequently, do not sell. Foreign wools are being taken quite freely, both in delivery of previous sales to arrive wools are being taken quite freely, both in delivery of previous sales to arrive and on new transactions. The price is based on the cost to import, and continues attractive to buyers, who look for a considerable advance if a duty is put on wool. The London sale is showing more firmness, and Americans are operating moderately. Carpet wools are quiet but firm.

PINANCE AND TRADE

The Features of the Money and Stock Markets.

NEW YORK, May 15.-Money on call easy at 14 per cent. Prime mercantile paper 31/64 per cent. Sterling exchange easy, with actual business in bankers' bills at \$4 874@4 874 for demand and \$4 864@4 864 for 60 days; posted rates \$4 87 and \$4 88@4 884; commercial bills, \$4 85% @4 85%. Bar silver 61%c. Mexican dollars 48c.

at 854.64 85%. Bar silver 61%c. Mexican dollars 48c.
Chicago Gas and Sugar absorbed over one-third of the total sales at the short session of the stock exchange to-day, the dealings being about equally divided between them. There was so little to encourage selling in the course of the price for Chicago Gas that the motive for it must be attributed to doubts of the value of the stock being equal to the price. There were, in fact, evidences of heavy liquidation in that stock based on apprehensions that the consolidated measure will fail of enuciment in the Illinois legislature, and with it the arrangement for division of territory with a rival company, which was made contingent upon its passage. Stop orders were reached on the way down, bringing large blocks of stock on the sagging market. Sugar also showed weakness on the probable effect of pending proceedings against members of the company for contempt of the senate, but recovered the loss. The Grangers, also, were subjected to special attack by the bears on account of the weakness of the wheat market. There was little encouragement to buy in the course of the London market, where Americans were largely neglected and prices were weak.

The anthracite coalers displayed some firmness due to covering of shorts over Sunday, and only trivial changes occurred in their prices. The Gould shares also manifested a continuance of the strength they displayed yesterday, but ild not outlast the day and their prices

also manifested a continuance of the strength they displayed yesterday, but it did not outlast the day and their prices declined in the later dealings, involving them in net losses. There was a general covering movement at the close of the session which, rallied prices slightly, nearly all through the list from % to ½ per cent from the lowest, the latter in Chicago Gas.

Prices generally of securities are quite substantially lower than they were a week ago, but there have not been lacking encouraging features in the week's trading.

Commission brokers are inclined to lay great stress upon the dealings in bucket shops to account for the loss of interest by the outside public in the market, and the stock exchange is engaged in very energetic efforts to stamp out bucket shops by legal proceedings, to discipline such of its own members as have any dealings with them or discretionary pool establishments, and to withhold the quotations on the exchange from the bucket shops and from the public at large. Whether an undue importance is attaching the standard commentations as cause. the rate of interest upon investments, se Hillnots Central Railroad Company is negotiated an issue of \$13,000,000 of per cent first mortgage bonds to ke up issues of the former Chesapeake Ohio Southwestern and the St. Louis Terre Haute railroads, now incorporated in the Hillnots Central systematic preceded bonds having so a per cent perceded bonds having so a per cent perceded bonds having so a per cent perceded bonds having the preceded bonds having so a per cent perceded bonds having so a per cent percently arranged for by her railroads, shows the willingness copied it invest in large amounts 1 203% per cent. At the same time, leaves no doubt of the possibility of her reads in good credit largely reading the mortgage to the same time. Leaves no doubt of the possibility of her reads in good credit largely reading the per companies which have effected bese reductions of interest; for a delike in the rate of interest means a relative rise in the market value principal, the of the first effects of these conversions has been to turn the attention of meritage and the same per companies which have effected base reductions of interest; for a delike in the rate of interest; for a delike in the rate

Brendstuffs and Provisions.

CHICAGO.- Liquidation of wheat was the feature of that market to-day but at its height was only strong enough to cause a %c break. By closing time all but \$4c of this had been recovered. The minor markets were relatively weaker than wheat, corn declining \$4@ \$4c, oats the same amount and provisions 7½@10c.

Acc outs the same amount and provisions 7½610c.

In wheat the market got a little encouragement to begin with from Liverpool, which appeared to have been underlined by the knowledge of yesterday's decline here, that market closing at unchanged prices. That appeared to be the only buillish influence, but it was strong enough to open wheat at a ½6% advance. But the strength faded almost immediately. The majority of the speculators took more account of favorable crop news, such as the showers in California were taken to be than of steadiness at Liverpool, which they knew would not continue long in the face of cheaper offerings from here. They supplied the early demand and had more for sale, which they could only get rid of by shading the price every few minutes until the price of July had tumbled from 73%, which was paid for a few

They supplied the early demand and had more for sale, which they could only get rid of by shading the price every few minutes until the price of July had tumbled from 72%, which was paid for a few lots at the start, to 72%, at which there were sellers about 11 o'clock.

The shipments abroad of wheat and flour from both coasts this week were equal to 2,183,175 bushels against 1,799,000 bushels on the week before, and 1900,000 bushels on the corresponding week last year. Argentina shipped no wheat to Europe this week. Receipts at Minneapolis and Duluth amounted to 346 care against 284 last week and 337 a year ago. Chicago receipts were reported at 7 cars. The Houldation, although not heavy enough to make an active market, still sufficient prices down until near the close, when some recovery ensued on the announcement that 23,000 hushels of cash wheat had been worked here. The market on this advanced to 25%, which was the closing price.

Corn was weak after the first few minutes of the session. Country offerings were more liberal and short selling was freer than any day this week, the generally favorable weather making the crowd bearish. The early strength was caused by the higher Liverpool market. Exports were 201,000 bushels. July opened 4g higher at 2545, sold at 2554c and declined to 24%, closing at 259254c. Quite an active session was apparent and prices drooped, longs being chiefly responsible. Commission houses bought freely after the first decline. Selers were received. At the close July poper was 100 lower at \$3 55, July lard 156, lower at \$3 55, July lard 156, declined to 18c and recovered to 184, declined to 18c and recovered to 184, collined to 18c and recovered to 1
